Mr. Masry's office has done an incredible job.
I don't know where he got this stuff,
ferreting out information
for the past several months
that will make your hair stand up on edge.

Walter Lack
January 4, 1994

Pacific Gas & Electric (PG&E) was in trouble.

Serious trouble.

Four decades after the world's largest utility started dumping 370 million gallons of cancer-causing chemicals into unlined ponds in Hinkley, California, the company's actions had finally been uncovered.

Uncovered by Erin Brockovich (a formerly unemployed, single mother of three working in a California law firm) who wanted to know what medical records had to do with a real estate file.

What she found out led to a record-breaking settlement for a group of class-action plaintiffs.
